

## **EATB 2017** **WORKSHOP**

### **How to prevent disease transmission in transplantation -Quality and Vigilance-**

**Thursday, October 19, 2017**

hrs. 14:30 17:30

Chairs:

Cristina Pintus & Aurora Navarro

## **INFORMATION ABOUT THE WORKSHOP:**

### **Addressed to**

health care professionals who, working in different organizations are involved in processes associated with donation, processing, management and use of tissues and cells.

### **Objectives**

to learn how to detect, prevent and correct patients' potential adverse outcomes through real cases investigation and analysis.

### **Performance**

we kindly ask EATB Congress attendees to send cases on quality and vigilance (adverse reactions and events) that could be presented during the workshop.

If you have no cases, just come and participate in the discussions!

### **Send your case**

If you have one or more cases, please download the "Case submission form " and complete this fully and send it back by email to:

[anavarro@bst.cat](mailto:anavarro@bst.cat)

and

[cristina.pintus@iss.it](mailto:cristina.pintus@iss.it).

The workshop will be organized in groups. Quality and vigilance tools will be used to analyse cases.
